

Daley Park Restroom Improvements Survey Results May 24 – June 7, 2016

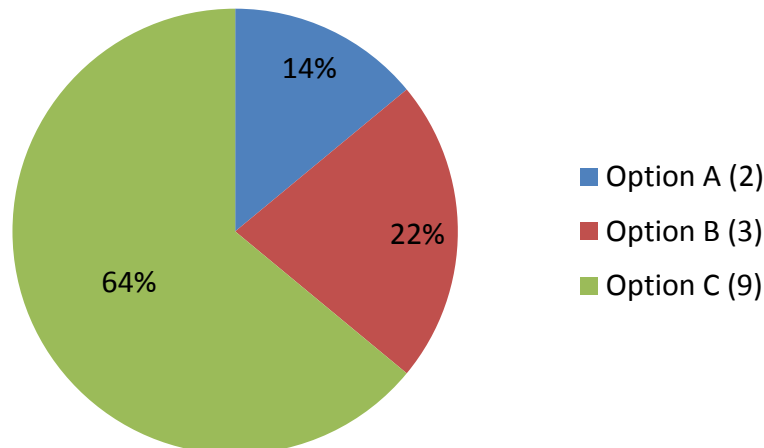

RESTROOM BACKGROUND: The current traditional style restroom facility (enclosed with stalls) will be demolished and rebuilt in the same location with a facility that includes unisex units. All proposed designs include four restrooms, two of which are accessible and a drinking fountain on the exterior of the building.

1. Of the three different design options, which do you prefer?

Total submissions: 15

2. Of the three different color & material schemes for the restroom building, which do you prefer?

Total submissions: 14

3. Any additional comments?

- Please put drinking fountains on dream lot. Please consider residents who are awakened at night and very early in the morning (5am) to loud maintenance worker.
- My only suggestion is to make sure that there are changing tables in men's and women's restrooms.
