## Noise Mitigation Flight Procedure Compliance:

### A. PHX Gate and Tempe Corridor Compliance

After a noise mitigation agreement was made between the City of Tempe and City of Phoenix in 1994, the Tempe Aviation Commission used a Standard Instrument Departure (SID) Procedure for the Phoenix Sky Harbor International Airport to develop a “Corridor” to measure how jet and large turboprop aircraft complied with the SID procedure. The City of Phoenix did not consider the Tempe corridor measure feasible to implement, and developed a 5,500 feet long exit “Gate” at Price Road, the 202 and 101 Red Mountain exchange as the official measure the airport is using to identify non-compliant airlines. The City of Phoenix issues notices of deviations to airlines, which jet aircraft make turns away from the Salt riverbed before they reach the “Gate.”

Corridor Compliance

Deviations caused by direction from air traffic control or adverse weather are not included in the notices. Departures deviations within the times of day weather conditions were present are not counted when calculating compliance. The month had five days when departure headings outside the “Gate” were identified by the City of Phoenix to be influenced by weather conditions<sup>1</sup>.

The monthly corridor compliance rate is 77.8 % with the large turboprop aircraft departures included, not shown. Large turboprop aircraft are routinely departing on diagonal headings to the northeast and southeast directly after take-off.

Gate Compliance

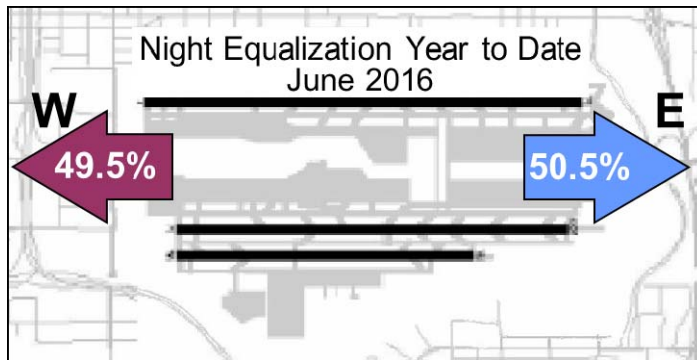

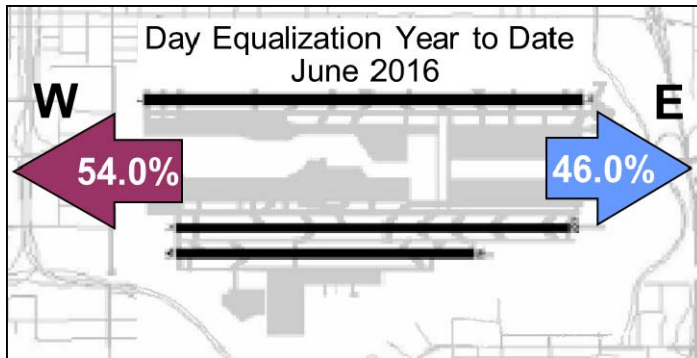

<sup>1</sup> Because the City of Phoenix is looking at the “Gate” deviations when it identifies the times departures were impacted by weather, applying these times to “Corridor” deviations may not fully account for all deviations impacted by weather.

The airline compliance rates shown are only including airlines with ten or more departures to the east during the month.

---

B. Annual Split East/West to Date

The noise mitigation agreement between the City of Tempe and the City of Phoenix calls for equalizing the noise burden from jet and large turboprop aircraft departures east and west during daytime and nighttime hours. The agreement calls for FAA compensation for periodic changes in flight pattern so equalization is accomplished over a twelve months period.

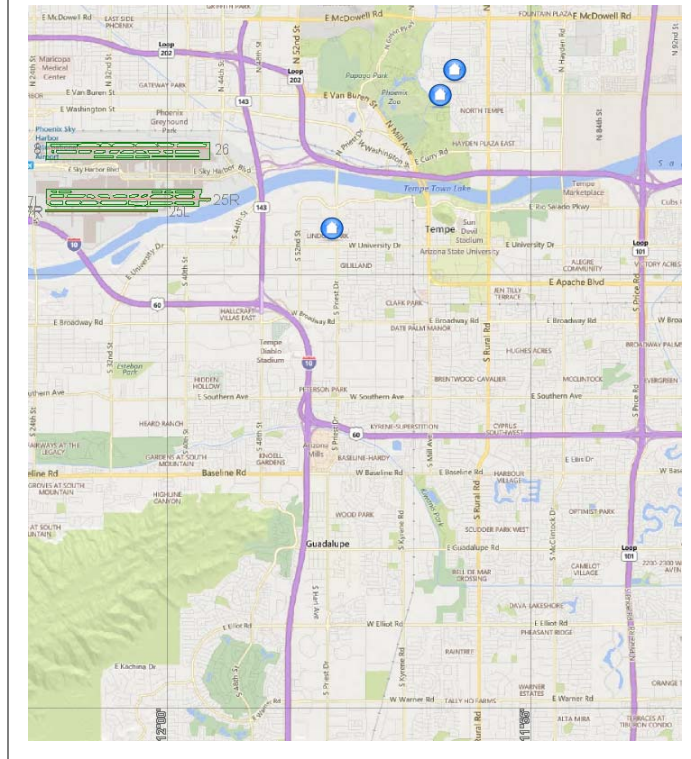

Another month with winds mainly blowing from westerly directions. Most of the departure activity was directed towards the west side of the airport.

### Noise Complaint Analysis:

#### C. Complaints by Area

## Complaint Addresses

### D. Complaints by Disturbance

E. Complaints by Air Traffic Flow

F. Complaints Received

Complaints are the number of phone calls, voice-mails, and electronic messages from residents calling in or using the Tempe 311 noise complaint form, <http://www.tempe.gov/city-hall/communication-and-media-relations/tempe-311/report-noise-complaints>.
