ZONING AND DEVELOPMENT CODE

CITY OF TEMPE

## **PART 5A – SPECIAL DISTRICTS**

### **CHAPTER 1 – URBAN CODE DISTRICT**

# PART 5A — - SPECIAL DISTRICTS

## CHAPTER 1 — - URBAN CODE DISTRICT

### Section 5A-101 - Purpose, Description, and Intent.

#### A. Purpose.

1. The purpose of the Urban Code District (UCD) is to advance the vision, goals, principles, and policies of the City's General Plan (General Plan), Urban Core Master Plan, Tempe Transportation Master Plan, and relevant Character Area Plans, which encourage appropriate land use and development and redevelopment that is compatible with the surrounding land use and aesthetic character, consistent with, and complementary to the community's focus on programs in transit, bicycle, and pedestrian infrastructure in key areas of the City.
2. Tempe is dedicated to providing a *multi-modal* transportation system that offers choices for people to move throughout the City, meeting changing transportation needs of residents and mitigating the impacts of congestion and pollution. The UCD aligns with Citywide land use, sustainability, and transportation objectives, emphasizes the design of buildings and public areas, promotes historic preservation, and provides standards that support pedestrian-oriented development of diverse and mixed land uses near *transit stations*.
3. The UCD relates to all transportation modes including light rail, streetcar, bus, vehicles, bicycle and foot traffic, and the emerging new transportation technologies (e.g., rideshare, autonomous vehicles, and electronic personal mobility devices).

#### B. Intent. The intent of the UCD is to:

1. Promote ridership for the Light Rail Transit, Tempe Streetcar and bus transportation systems;
2. Promote economic development objectives by creating new businesses and jobs, improving pedestrian environments including providing shade to protect pedestrians from urban desert conditions, and enhancing neighborhood vitality;
3. Facilitate enhanced pedestrian, bicycle and transit connectivity, and accessibility, while promoting transit use by connecting development along the Streetcar and Light Rail routes to appropriate areas;
4. Provide increased access to transit stops and stations and local destinations by creating enhanced pedestrian and bicycle connections;
5. Encourage good design of building and public areas that contribute to the quality of urban environments to attract and encourage pedestrian activity;

6. Enable mixed-uses and appropriate densities in different zones as identified on the UCD map in Figure 5A-102A;
7. Promote preservation of existing historic properties, neighborhoods and other desirable areas;
8. Promote transit-supportive developments, and increase residential and employment densities in locations close to transit stations; and
9. Provide appropriate transitions and buffers to adjacent land uses.

## **Section 5A-102. – Applicability.**

### **A. Applicability.**

1. Part 5A, Chapter 1, Urban Code District, shall not take effect on a property(ies) until such time the property owner(s) signs and authorizes an opt-in form in order to apply the standards to a current/future development or use. Property owner(s) shall sign a waiver of rights and remedies form. By signing the form, the owner(s) voluntarily waives any right to claim compensation for diminution of property value under A.R.S. §12-1134 that may now or in the future exist, as a result of the City's adopted ordinance, including any modifications imposed as a condition of approval. The signed form shall be notarized, submitted to the Community Development Department, and recorded with the Maricopa County Recorder's Office in order to be in effect.
2. The requirements of this Chapter apply to all land uses, new development, redevelopment, and exterior alterations to existing development within the UCD, except as provided in Section 5A-102(B), Exemptions. The requirements of this Chapter replace all previous underlying zoning district regulations and shall be considered in combination with the standards in Part 4, Development Standards.
3. The UCD has limited application to properties identified as UC-7 on the Tempe Streetcar route south of University Drive on the west side of Mill Avenue, and only the requirements of Section 5A-105(E), Frontage Standards, shall apply to these properties. Refer to the underlying zoning for allowed uses and development standards.
4. Property owners with an existing Planned Area Development Overlay (PAD) may opt-in to the UCD and corresponding Zone by signing the opt-in form, pursuant to Section 5A-102(A)(1). Upon completion of the opt-in process the PAD site may seek a new development plan review that complies with the provisions of UCD, without further amendments to the PAD. For compliance with UCD standards, refer to Section 5A-102(E), Conflicts. Properties which have opted in shall not be allowed to use the PAD process for the relief of the regulations required within the UCD, unless such relief is specifically identified in this Chapter.

### **B. Exemptions.** The following are exempt from the requirements in Chapter 1, Urban Code District:

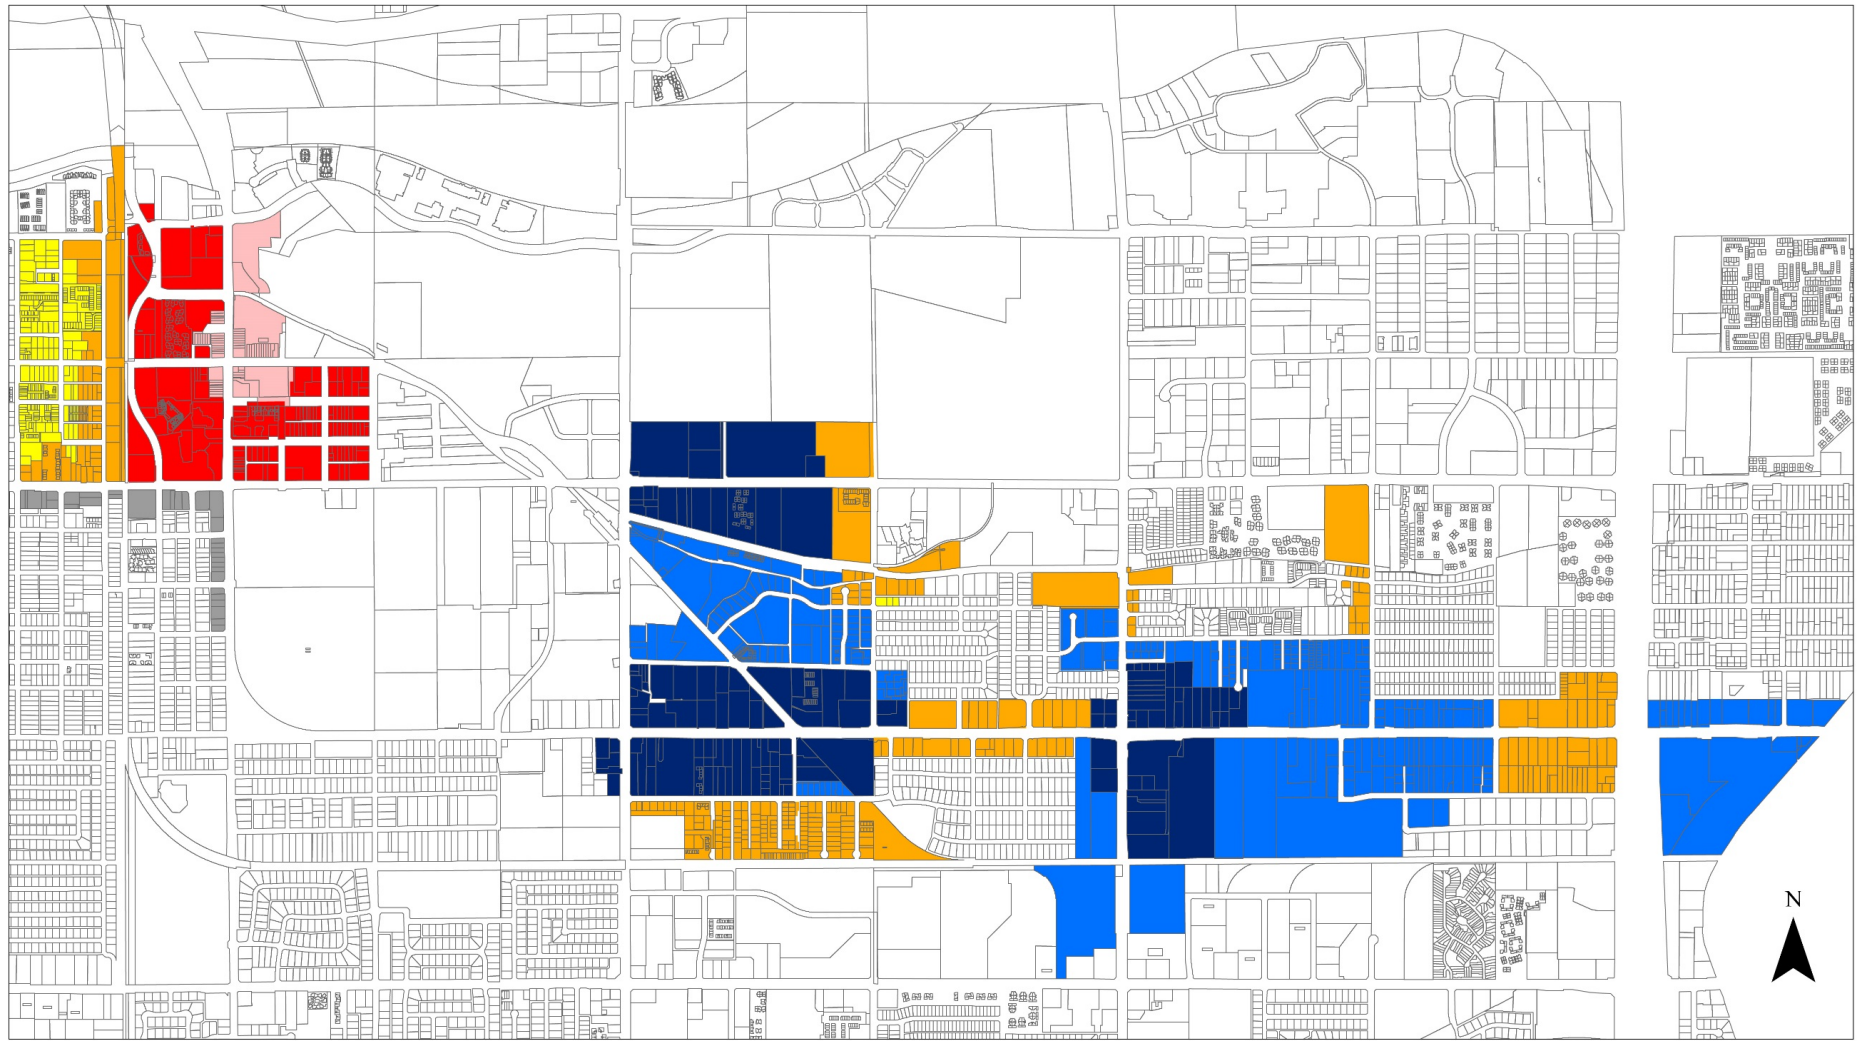

1. Single-Family Residential and Agricultural districts;
2. City, state or federal historic-designated and historic-eligible properties, districts, or buildings;
3. Repair, maintenance, replacement, and non-conforming uses pursuant to Part 3, Chapter 5, Legal Non-Conforming Use or Development;
4. Modifications to a structure to meet the requirements of the Americans with Disabilities Act; or
5. Expansions to existing facilities which result in required compliance with the UCD that the Community Development Director determines to be not feasible or prudent.

### **C. Boundaries and UCD Map.**

1. The UCD is comprised of seven (7) Zones as described and established in Subsection D below. The UCD Zones are illustrated in Figure 5A-102A and mapped on the online City of Tempe Zoning Map.
2. When a property is located partially within the UCD boundary as mapped on the City of Tempe Zoning Map, the entire property shall comply with the standards applicable to the Zone in which a part of the property is located.
3. If the boundary of a UCD Zone divides a site into separate Zones, the standards of the respective Zones shall apply.
4. A site which is outside the UCD boundaries and being developed to conform to the UCD standards may be added into the UCD under the following conditions.
  - a. The site is adjacent to the UCD boundary or is separated by a public alley or street right-of-way from a site that is within the boundaries of the UCD. Adding the outside site to the UCD will follow the same procedures for a zoning map amendment pursuant to Section 6-304, Zoning Map Amendments and Code Text Amendments.
5. Applications pursuant to Section 6-307, Subdivisions, Lot Splits, and Adjustments for a site that is within, or adjacent to the UCD boundaries, may require an amendment to the UCD to maintain one zoning classification per lot within the proposed subdivision.

D. **Establishment of UCD Zones.** The UCD is divided into seven (7) Zones to allow land uses and development standards that are appropriate for the location where each Zone lies. This approach encourages a mix of land uses and allows appropriate densities of development in specific zones that are compatible with the existing patterns of development. Each zone promotes developments with mixed-use, pedestrian-friendly environments and active ground floors.

The following Zones are arranged from highest to lowest levels of development intensity.

1. **UC-1.** Zone 1 is designed for the highest intensity of development intended to promote high density development in the downtown area. Here, *mid-rise buildings* and *point towers* allow more ground floor open space such as plazas, and aesthetically pleasant *street façades*.
2. **UC-2.** Zone 2 is designed for high intensity of development with mostly and *mid-rise* and *low-rise buildings* with sensitive juxtaposition to the building in historic core and on Mill Avenue in the downtown.
3. **UC-3.** Zone 3 is designed for medium intensity development that is appropriate at *transit stations* and intersections of major connecting *streets*. A mix of *mid-rise* and *low-rise* development may include open spaces in courtyard or on rooftops for the on-site occupants.
4. **UC-4.** Zone 4 is designed for moderate intensity development with building types suitable within approximately 1/4-mile of nearby *transit stations*. The mostly *low-rise* buildings need to be stepped down to make them compatible with adjacent residential neighborhoods.
5. **UC-5.** Zone 5 is designed for low to moderate intensity of development with *low-rise* building types. All buildings shall be oriented towards high capacity transit corridors and need to be stepped down to make them compatible with adjacent residential neighborhoods.
6. **UC-6.** Zone 6 is designed to help preserve established neighborhoods by providing low intensity development with *low-rise* building types that are compatible with the surrounding residential neighborhoods. Buildings need to be stepped down to make them compatible with adjacent residential neighborhoods
7. **UC-7.** Zone 7 is designed to help preserve the surrounding neighborhoods and applies only to a limited number of properties located immediately to the west of Mill Avenue and south of University Drive up to 11th Street. No additional heights and densities related to UCD are available in this Zone.

E. **Conflicts.** Where a conflict exists between any provision of the UCD and other standards in the Code, the UCD provisions shall govern. Where a conflict exists between provisions of the UCD and any other overlay (such as Historic Preservation Overlay), the provision that is most restrictive shall govern as determined by the Community Development Director or designee.

## Section 5A-103 – Legal Non-Conforming Use or Development.

A legal non-conforming use is a use that is not currently permitted in the UCD but was lawfully established prior to the adoption of the UCD. Expansions, rebuilding and reconstruction of structures containing a non-conforming use, and abandonment or change in use shall be subject to the provisions of Part 3, Chapter 5, Non-Conforming Use or Development.

## Section 5A-104 – Land Uses.

### A. Establishment of Permitted Uses.

1. Any of the land uses permitted in Table 5A-104A, Permitted Uses in UCD Zones, may be established subject to the requirements listed in the Table, and in compliance with all applicable standards of this Code.
2. Where a use on a single lot includes two or more Zones, the entire site will be subject to the most restrictive land use.
3. If a proposed use is not listed in Table 5A-104A or defined in whole or in part in Part 7, Definitions, the use is not permitted unless the Community Development Director or designee determines that the proposed use is substantially similar to a use specified as a permitted or conditional use in that Zone following the requirements of Section 6-301, Code Interpretations and Similar Use Rulings.

### B. Active Ground Floor Uses.

1. **Purpose.** The purpose of this subsection is to require appropriate uses on the ground floor to create an enhanced pedestrian environment near the development.
2. **Standards.** Standards for *active ground floor uses* are provided in Section 5A-105(D), Standards for Active Ground Floor Uses.
3. **Uses Required.** *Active ground floor uses* are required in the UCD Zones 1-4 as indicated in Table 5A-104A, Permitted Uses in UCD Zones.

**C. Permitted Uses in UCD Zones.** Table 5A-104A, Permitted Uses in UCD Zones, identifies the land uses permitted by the UCD Zone together with any planning permit type required for each use. See the key below the table.

P = Permitted

S = Permitted with special standards or limitations

U = Use permit required

N = Not permitted

(a) = Security plan required. See Section 6-313, Security Plan.

**D. UCD Special Use Standards.** This Subsection provides additional standards and requirements for certain land uses that require special considerations in the UCD Zones.

1. **Drive-Through Facilities.** Drive-through facilities shall comply with the standards in Section 3-408, Drive-Through Facilities, unless otherwise provided in this Subsection.

- a. **Design Objectives.**

- i. A drive-through facility is permitted if the design and operation will not create congestion, disrupt pedestrian or bicycle circulation, and will limit pavement.
    - ii. Fencing, walls and landscaping shall be provided between building sites in a manner that does not hamper natural surveillance.
    - iii. Drive through lanes shall be integrated with the building and not visible from the perimeter of the site

- b. **Location.** Retail or service uses with drive-through facilities shall be designed so that the front of the building is placed at or near the edge of the sidewalk so that the drive-through is located behind or to the side of the building away from the *street frontage*. Drive-through windows or lanes may not be located in the following areas:

- i. Between a property line and the front of a building;
  - ii. Adjacent to a public *street*; or
  - iii. Within fifty (50) feet of any off-site residential use.
2. **Outdoor Seating.** For any outdoor seating in the right-of-way, an encroachment permit from Engineering and Transportation Department is required. A Specialty License from City of Tempe’s Tax and License Division as required per Section 3-425.

**Section 5A-105 – Development Standards.**

**A. Purpose and Applicability.**

- 1. **Purpose.** This Section provides regulatory standards governing land use, design and building form within the UCD Zones. These standards are intended to ensure that proposed development is compatible with existing and future development and produces an enhanced pedestrian environment consistent with the objectives of the UCD.
- 2. **Applicability.** The requirements of this Section apply to all proposed development within the UCD Zones. If there is a conflict between any standards, the more restrictive standard shall prevail. Refer to section 5A-102B for Exemptions.

**B. Building Form and Placement.** Table 5A-105A provides development standards for Building Form and Placement organized by UCD Zone.

**Table 5A-105N – Stoop**

**Description**

The main *façade* of the building is near the right-of-way line and the stoop connects to the sidewalk. This frontage type is elevated above the sidewalk to ensure privacy within the building and is smaller than a porch. The entrance is usually an exterior stair and landing. This type is recommended for ground-floor residential or live-work uses.

**Standards**

Entry doors are encouraged to be covered or recessed.

Table 5A-105O – Terrace

**Description**

The main *façade* of the building has an elevated terrace that projects outward with frequent stairs. This frontage type allows at-grade access to elevated ground floor uses due to natural grade constraints or by artificially elevating the terrace floor. This frontage type acts as a buffer from the sidewalk and may be landscaped to provide additional privacy. Building activities are slightly separated from the adjacent sidewalk by the terrace finish level, and the depth of the terrace provides a buffer for outdoor seating, private yards, shade, or any other appropriate uses.

**Standards**

**D. Standards for Active Ground Floor Design.** The purpose of this Subsection is to provide design criteria to encourage pedestrian activity and create a safe, accessible, comfortable, and vibrant pedestrian environment.

1. **Parking Structures.** A maximum of thirty (30) percent of the ground floor *façade* of a parking structure may face the *street* without complying with the requirements of this section.
2. **Building Entry.** A building entrance serves both the building's tenants and customers. The following standards apply to the design and placement of building entries.
  - a. The primary entrance to a building shall face a *street*, and be located within twenty (20) feet of a *street* sidewalk or be connected to a *street* through a *plaza* or other civic space area (see Subsection M, Civic Space Standards) as shown in Figure 5A-105A. When it is not possible to locate the primary entrance to face the *street*, *plaza*, or civic space, a secondary entrance shall be designed to connect the building to these public spaces.
  - b. Building entrances shall be connected to a public sidewalk consistent with Section 4-503, Pedestrian and Bicycle Access and Circulation Standards.

**Figure 5A-105A. Primary Building Entry**

- c. When located at the intersection of two (2) public *streets*, at least one of the following shall be provided, consistent with Figure 5A-105B below:
  - i. Two (2) primary entrances, one facing each *street*;
  - ii. A corner entrance, oriented toward both *streets* placed at an angle of forty-five (45) degrees; or
  - iii. One (1) entrance not more than twenty (20) feet from either *street*

**Figure 5A-105B. Primary Building Entry at Intersection**

- iv. The main entrance to a building that is open to the public shall be clearly identifiable by and enhancing the architectural details, such as a change in plane (e.g., the entrance may be recessed on the *street level façade*), differentiation in material and color, enhanced lighting, and signs.
- v. Buildings shall be designed with direct and convenient access (e.g., via a pathway) to a transit stop or station as illustrated in Figure 5A-105C. A porch, patio or civic space as described in Subsection M, Civic Space Standards may be placed between a residential use and the public right-of-way, screened by fencing, walls, or landscaping no taller than four (4) feet in height, maintained to provide natural surveillance.

**Figure 5A-105C. Building Design in Proximity to Transit**

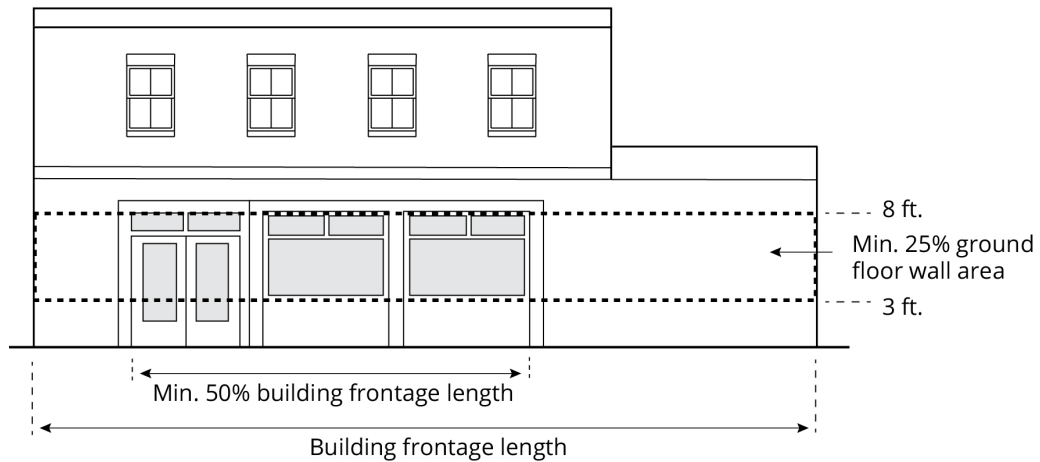

- vi. Utility, mechanical room, or service entrance doors shall not face the public street.

- vii. If glass entry doors are used, they shall have the same solar qualities as those of the storefront window design.
- viii. A building or development with four-hundred and fifty (450) linear feet or more of *street frontage* shall provide pedestrian access into the site by means of an amenity in the building *frontage*, such as a pocket *plaza* or other civic space as described in Subsection M, Civic Space Standards.

**E. Ground Floor Windows.** *Ground floor windows* shall provide visibility to and from buildings at the *street* front of the development to create a safe and interactive environment. The placement, pattern, scale, size, and rhythm of windows on building *façades* shall be addressed with the following standards:

1. *Ground floor windows* shall be applied to at least fifty (50) percent of the building length and twenty-five (25) percent of the *ground level* wall surface area of all building *façades* that face a *street* or civic space type (see Subsection I, Outdoor Gathering Space Standards) as shown in Figure 5A-105D. These standards apply to the area of the *façade* between three (3) feet and eight (8) feet above the adjacent finished grade or sidewalk, whichever is higher.

**Figure 5A-105D. Ground Floor Windows**

2. Required *ground floor windows* shall be transparent to allow views from outside the building into the working areas, lobbies, and pedestrian entrances, or shall be display windows set into the wall. Display cases attached to the outside wall do not qualify. The bottom of the windows shall be no more than three (3) feet above the adjacent finish grade or public sidewalk.
3. Glass block is not considered a window for the purpose of this Subsection.

**F. Façades Facing Existing Single-family Residential.** The *façades* of all new developments which face an existing single-family residential district or use and not

separated by an alley shall comply with the following standards to protect the privacy of the existing residents.

1. Design buildings to have similar attention to detail as the *street front façade* to provide visual interest in materials and structure to address potential views from residences;
2. Protect the privacy of adjacent single-family residences through design solutions such as clerestory or slot windows, *step-back*, louvers or privacy screens, and opaque or translucent glazing.

**G. Land Use Buffer**

1. Provide a minimum ten (10) foot clear landscape buffer with trees spaced a maximum of twenty (20) feet on center with an eight-foot masonry or concrete wall to assure the privacy of adjacent residents;
2. Where a commercial, office or industrial development of over fifty thousand (50,000) square feet of building area is located adjacent to a single-family residential district or use, the landscape buffer described above in this section shall be a minimum of twenty (20) feet wide adjacent to that use. This buffer shall be planted with two (2) rows of trees along the interior side of the required wall. Each row is to contain trees spaced at thirty (30) feet on center and staggered by fifteen (15) feet to the adjacent row, except where an alternative design approved through development plan review would provide an equal or better effect in screening the two (2) uses.

**H. Encroachments and Projections.**

1. **Encroachments.** Portions of buildings and structures including marquees, awnings, shade structures, projecting signs, and architectural features may encroach into the public right-of-way, subject to the review and approval by the City Engineer, or designee, as part of the encroachment permit process defined in Tempe City Code Chapter 29, Streets and Sidewalks. Encroachments and projections into the right-of-way shall not include habitable space.
2. **Projections.** Projections into applicable setback areas are permitted as described in Table 5A-105P.

Table 5A-105P – UCD Projections into Setback Areas				
Projection	Front (feet) (max.)	Rear (feet) (max.)	Side (feet) (max.)	Street Side (feet) (max.)

**I. Outdoor Gathering Space Standards.**

1. Applicability. Outdoor Gathering spaces are intended for open air or semi-enclosed public gathering spaces that connect to different land uses and provide focal points and anchors emphasizing the pedestrian scale and focus.
2. Standards. Standards for *outdoor gathering spaces* are provided below:
  - a. Outdoor gathering space shall be integrated as part of the overall site design and located in an area that is accessible to a large number of users and to establish functional relationships and linkages within the site or between adjacent sites.
  - b. Is designed as a single, contiguous space, rather than multiple smaller spaces.
  - c. Incorporates a minimum of three of the following pedestrian scale features:
    - i. Lighted bollards
    - ii. Movable tables and chairs
    - iii. Benches
    - iv. Seat walls and / or raised landscape planters
    - v. Shade trees

## Section 5A-107 – Trip Reduction Plan.

### A. Purpose and Applicability.

1. **Purpose.** This Section describes required elements of a Trip Reduction Plan. The Trip Reduction Plan is intended to prevent, reduce, and mitigate the impacts of development on the transportation system, neighborhood livability, safety, and the environment while reducing transportation system costs. Trip Reduction Plans provide residents, employees, and visitors with information and incentives to use transportation modes other than single occupancy vehicles, which encourage efficient use of the transportation system, reduce *peak period*

automobile use, manage congestion, reduce automobile dependence, and enhance *multi-modal* transportation. Trip Reduction Plans will:

- a. Accommodate growth and development allowed under the TOD, Urban Core Master Plan and General Plan while reducing *peak period* automobile commute trips to achieve the goals of the City's Transportation Master Plan.
2. **Applicability.** A Trip Reduction Plan shall be required of developments that will generate 75 or more peak hour trips or for development proposals that apply for exceptions to the minimum vehicle parking requirement of this code.

All applicable Trip Reduction fees, penalties, reporting requirements, program implementation, and other Trip Reduction obligations are the sole responsibility of the property owner. The Trip Reduction requirements are part of the conditions of permit(s) associated with the property. Trip Reduction requirements apply to the property regardless of ownership.

3. **Exemption.** Residential uses in developments that provide a minimum of 10% of residential units between 0% and 80% of Area Median Income (AMI) shall be exempt from the requirements in this Section. Residential units in developments that provide a minimum of 20% of residential units between 81% and 120% of Area Median Income (AMI) shall be exempt from the requirements in this Section. Retail and restaurant uses are exempt from the requirements in this Section.

#### B. Trip Reduction Plan Requirement.

Eligible developments shall identify trip reduction policies or strategies in the Trip Reduction Plan as described in the *Policy for the Preparation of Transportation Impact Studies and Trip Reduction Plans*.

The Engineering and Transportation Director or designee will review each Trip Reduction Plan to ensure it is complete. Once deemed complete, the Engineering and Transportation Director or designee will review to ensure the required target has been achieved by a selection of Trip Reduction policies or strategies. The Trip Reduction Plan shall be submitted in conjunction with the development plan review application. The requirement for a Trip Reduction Plan and the selected policies and strategies shall be incorporated as a Condition of Approval of the Development Project.

1. **Trip Reduction Targets.** Trip Reduction Plans shall identify the strategies or policies that reduce the travel demand or redistribute that demand in space or in time. Strategies or policies shall be implemented either in the development or through ongoing policies and programs. Recommended trip reduction policies and strategies are included in the *Policy for the Preparation of Transportation Impact Studies and Trip Reduction Plans*. Each trip reduction strategy is assigned trip reduction points reflecting its relative effectiveness in reducing peak hour single-occupancy vehicle trips. Trip Reduction Targets for development proposals are listed in Table 5A-107A.

Table 5A-107A – Trip Reduction Targets for Developments		
Peak Hour Trips	Trip Reduction Plan Required	Minimum Reduction Target
0-75	No	-
75-150	Yes, Level 1	10 points
150 +	Yes, Level 2	20 points

2. **Trip Reduction Targets for Reducing the Minimum Vehicle Park Requirements.** Development proposals, at the applicant’s option, may reduce the minimum vehicle parking requirements as defined in Section 5-605(O)(III)(a). Trip Reduction Targets for development proposals that reduce the minimum vehicle parking requirement are listed in Table 5A-107B.

Table 5A-107B – Trip Reduction Targets for Reduced Minimum Vehicle Parking Requirements		
Peak Hour Trips	Trip Reduction Plan Required	Minimum Reduction Target
0-75	Yes, Level 1	10 points
75-150	Yes, Level 1	15 points
150 +	Yes, Level 2	25 points

- C. **Trip Reduction Reporting Requirement.** Developments that are required to submit a Level 2 Trip Reduction Plan shall report on trip reduction measures annually as described in the *Policy for the Preparation of Transportation Impact Studies and Trip Reduction Plans*.
