**FINDINGS:**

09/08/2020 The Code Compliance Division received a complaint for deteriorated landscape. Inspected the property and found grass and weeds in the gravel landscape, and a couple of dead bushes or small trees in the front yard landscape. Notice to comply was mailed to the owner.

09/29/2020 Re-inspected the property. There has been no change to the property. A final notice was mailed.

10/15/2020 There has been no change to the dead trees in the front yard of the property. A pink hanger was hung on the door asking for contact or compliance by 10/20/2020 to avoid a citation.

10/22/2020 Inspected the property. There has been no change in the condition of the property and no contact from the owner. Issued a citation for the landscape. Pictures were taken to show the condition of the property.

10/29/2020 Received a subpoena to appear in court. It was scheduled for November 12<sup>th</sup> at 8:15 a.m.

11/12/2020 Court was to take place. However, the property owner failed to appear.

12/02/2020 Requested bids for the cleanup of the landscape in the front yard of the property. The hearing is scheduled for January 5<sup>th</sup>, 2021.

**RECOMMENDATIONS:**

I recommend an abatement of the nuisance violation at the property located at 1829 E. Watson Dr. The property owner has failed to bring the property into compliance with Tempe City Code 21-3-b.8, and they have been given ample time. The property represents an eyesore and health and safety issue to the community.

Without the intervention of abatement, the property will continue to deteriorate. I therefore make a request to the City of Tempe Community Development Hearing Officer for authorization to abate this public nuisance in accordance with section 21-53 of the Tempe City Code.

Respectfully submitted,

Julie Scofield

**LIMITATIONS OF MOLD REMEDIATION**

SHC's scope of work is/was limited to the areas addressed in this proposal/report. Remediation includes removal of designated areas of visible mold growth and cleaning of visible dust and debris within the defined work area(s).

SHC's scope of work does/did not include inspection of the residence/building for mold growth or related issues. SHC's visit to the work site for bidding purposes and remediation work shall not be considered a comprehensive or cursory inspection for mold growth, moisture sources, causes of mold growth or mold exposure. Any reports relating to remediation prepared by SHC are not inspection reports.

SHC is/was not responsible for determination of cause or origin of leaks or moisture sources or other causes of mold growth nor did SHC fix, repair or abate the cause of water or moisture resulting in mold growth. If the source of water or moisture is not abated or if future sources of water or moisture occur, mold growth will likely reappear. SHC is/was not responsible for the water source or mold growth

Completion of the remediation work does not mean the entire area or building is free of mold nor does completion of the work mean the area or building is safe for occupancy. The only manner to determine if the area is free of mold and safe for occupancy is to have a complete and comprehensive inspection and assessment of the building.

SHC recommends inspection and assessment of the area/building be performed by a qualified and experienced mold inspector. After cleaning is complete, a final visual inspection of the building shall be performed. If all surfaces are visibly clean, post remediation surface and air testing should be performed. If visual inspection fails, SHC shall re-clean all affected areas as directed by the industrial hygienist/consultant.

Post remediation surface and air sampling will be performed following completion of all removal, cleaning and visual inspections. Air sampling should include sampling for total mold spores. A third party, such as an industrial hygienist or consultant, should perform sampling and the visual inspection.

If sampling indicates indoor concentrations are greater than outdoor concentrations, final cleaning as described previously shall be repeated and additional samples collected. Additional cleaning and sampling shall be performed until results of sampling indicate that indoor concentrations of airborne mold are not significantly different from outdoor concentrations and tape lift samples indicate the surfaces in the work area are free of settled mold spores.

After airborne mold samples indicate indoor concentrations are not significantly higher than outdoor concentrations and tape lift surface samples indicate surfaces are free of excessive mold Southwest Hazard Control, Inc. will have completed this mold remediation project.
